## OnlinePajak - coding challenge

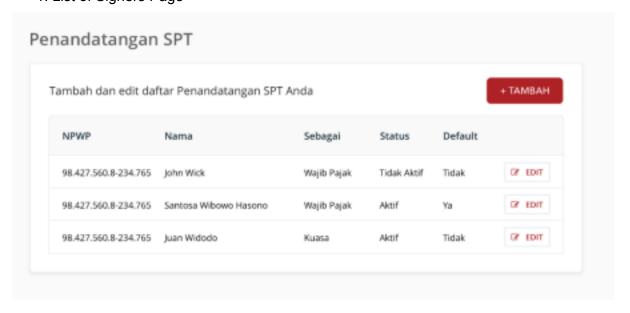

You are required to create a Web App that can operate CRUD of SPT signers data.

## Requirement:

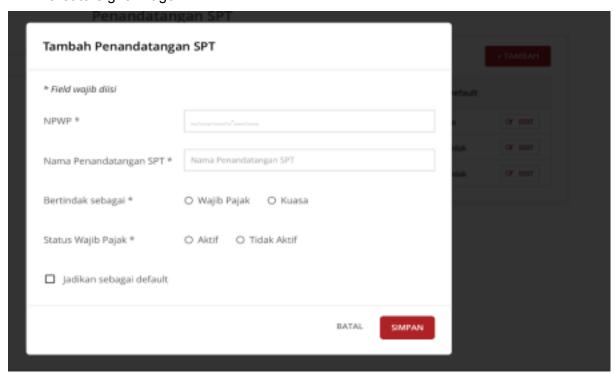

- 1. Your application should be written using Vue 3 (Composition API).
- 2. Implement form validation, every field is required.
- 3. NPWP must be displayed using separators, but when stores don't use separators.
- 4. Show success / error notification.
- 5. (nice to have) Create a snapshot test.
- 6. (nice to have ) A well-structured and clean project that follows the Single Responsibility Principle and adheres to clean code practices.

You can use this API in your project: <a href="https://online-test-api.achilles.systems/docs">https://online-test-api.achilles.systems/docs</a>

1. List of Signers Page

## 2. Create Signer Page

## 3. Update Signer Page
